Shade fabric reduces heat generating energy produced by the sun. Ideal for high sunlight regions or light sensitive plants.

Commercial grade - 6 mil - polyethylene covering is secured to structure via Conley's unique spring locking system.

Bench assemblies offer a comfortable platform for working or growing. Porous bench tops allow water to drain through.

Conley's bolt-together design incorporates the same technology used in commercial greenhouses.

Side wall roll-up windows optimize fresh air quality and helps maintain a cooler growing environment.

Conley's "how to" video offers easy to follow step-by-step assembly instructions.

8' WIDE X 12' LONG *GARDEN PRO* STRUCTURE COMPLETE WITH FRAME, 6 MIL CLEAR POLY COVERING, SPRING LOCK & ONE (1) 36" WIDE X 80" TALL ENTRY DOOR.
